• RMS inks new agreement to represent Fluenta products in Egypt through to 2020

Fluenta (https://fluenta.com), a global leader in ultrasonic measurement and management technology for the oil and gas and chemical processing industries, today announces an extension of its agreement with RMS (https://www.rms-engineering.com/) to sell Fluenta products in Egypt.

Kevin Spiess, Sales Director for EMEA and APAC at Fluenta, commented; “RMS has worked with Fluenta since 2010 and has seen great recent success in the supply of flare gas meters to the Zohr megaproject as part of the rehabilitation of an old system for Badr Petroleum Co. (BAPETCO) and the British Petroleum project in the West-Nile Delta. In addition, RMS has been able to offer local service and support to our customers in Egypt, proving a first-class service often at very short notice”.

Sherif Moharam, Sales & Marketing Manager for RMS added; “RMS has worked hard to build the Fluenta brand, not simply in terms of the products but also in aftersales service where we ensure existing Fluenta meters are well maintained. With many new projects on the horizon for the Egyptian oil and gas sector, this new agreement ensures operators in Egypt have access to the most accurate technology for measuring flare gas”.
