

The Sqish - A discreet alternative to a satellite dish.

Submitted by: The Satellite Shop

Friday, 20 April 2012

The Sqish (square dish) is a discreet alternative to a satellite dish. Its compatible with all Sky & Freesat systems across most of the UK. It can also be used to receive high powered satellites across Europe and the rest of the World.

The Sqish can be sqishoflaged to help it blend into its surroundings with the addition of a bespoke skin created from a digital photo of the site.

Why use a Sqish? It minimises environmental impact. Its ideal for use on listed buildings and in conservation areas (with permission).

Our new model is smaller, lighter, better value and performance.

Sqish Website (<http://www.sqish.co.uk>)

Sqish Facebook Page (<http://www.facebook.com/SqishDish>)

1 - The Satellite Shop are an Independent retailer based in Tunbridge Wells, Kent since 1990. They import & distribute the Sqish across the UK and parts of Europe.

2 - The Sqish is available nationwide via a network of over 300 authorised retailers and professional installers. More details and high resolution artwork available at www.sqish.co.uk
