

Cloud Service Provider Calligo Announces UK Expansion

Submitted by: Calligo

Tuesday, 19 April 2016

Calligo, the leading cloud provider, today announced a major expansion of its business in the UK. The company has opened a new office in London and has appointed Mark Thomas as Director of On-Boarding Services to support and grow its client base across the country.

Julian Box, Co-Founder and Chief Executive Officer commented:

“Our push into the UK is in recognition of the size and opportunity of the cloud market in the UK and is a natural next step given the strong client base we already enjoy in there. The London office is further evidence of our commitment to building a lasting presence in the UK and to delivering our unique blend of cloud services where privacy, performance and customised service are at its heart.”

Mark Thomas will lead the company's On-Boarding team, ensuring Calligo's new and existing clients receive the highest quality experience, engaging directly with clients to ensure a smooth transition to Calligo's products and services. Before joining Calligo, Mark was the Solutions Architect at Databarracks, responsible for the design and implementation of their award winning Infrastructure-as-a-Service and Disaster-Recovery-as-a-Service offerings. He has also held leadership roles at VirtualizeIT and Virtustream.

Further hires in the UK will follow in the coming months as Calligo continues to grow its presence in the UK.

Calligo's new London office is located at 1 Lancaster Place, London WC2E 7ED.

ABOUT CALLIGO

Calligo is an innovative cloud service provider offering mid-sized companies the highest levels of data privacy and security. Calligo offers unparalleled application performance guarantees, commercial flexibility and a personalised support service from its globally located cloud platforms. Through its four pillars of focus, Calligo delivers a platform that businesses can trust to deliver the high level of service and protection they expect and is lacking in many cloud offerings.
