ViewSonic's interactive flat panel (IFP) displays to feature dizmo's collaborative digital workspace software.

ViewSonic Corp. (http://www.viewsoniceurope.com/uk/), a leading global provider of visual solution products, announces its collaboration with leading software company, dizmo. The new partnership will launch at ISE 2017 with dizmo software running on ViewSonic's ViewBoard — the company's newest interactive flat panel (IFP) display.

"The launch of our ViewBoard at ISE 2017 presents the perfect opportunity to announce our partnership with dizmo. The collaboration will allow our users to utilize dizmo's innovative digital workspace software on our ViewBoard displays, transforming team collaboration as we know it", said Brian Wei, ViewSonic's Director of Commercial Displays & Solutions, Europe. "We look forward to combining our expertise in display technology with dizmo's state-of-the-art software to provide a more dynamic user experience to the corporate and educational sectors."

ViewSonic's interactive ViewBoard, available in new screen sizes of 75" and 86", is a key part of the company's IFP product line and is focused on providing dynamic collaborative solutions in the corporate and education sectors. ViewBoard comes with an embedded computer which provides users with easy installation and connection. Its 20-point touch response functionality makes ViewBoard a versatile collaborative tool that allows multiple users to interact on the panel simultaneously. This functionality, combined with dizmo software, enables the ViewBoard to increase interactivity, engagement and team collaboration.

As a workspace technology, dizmo allows data to be sourced from any input – web feed, video stream, Google Docs, Slack, Jira or other collaboration applications – and represented on a unified surface, anywhere on any operating system or device. Dizmo also supports app-to-app communication, making data more interactive and intuitive.

"Dizmo is the Interface of Things; a user-definable, disruptive, multi-purpose digital workspace that transforms the way we interact with data, content, apps and connected "things". It's about making data more humanly intuitive, relevant, shareable and actionable," said Luigi Mantellassi, CMO & Co-Founder at dizmo. "At ISE 2017 we will showcase how beneficial dizmo's digital workspace can be for collaboration when paired with ViewSonic displays."

ViewSonic's customers will now be able to leverage dizmo's digital workspace software to get more out of their display capabilities. The flexibility to integrate multiple data types from numerous sources will allow users to transform their digital display into an interactive, collaborative, future-proof workspace.

ISE 2017 will be taking place on February 7-10 at the RAI Exhibition Centre in Amsterdam.
