

# Swyx announces new version of macOS desktop client

Submitted by: TTA Communications (Bath)

Wednesday, 8 February 2017

---

- Personalisation options & technical advancements enhance communications

Available from today, users of Swyx's innovative communications solution on a Mac can download an updated and improved version of the desktop app through the App Store (<http://www.apple.com>). In addition to numerous customisation options, SwyxDesktop for macOS has also been technically optimised.

The new version 1.2.0 now also supports the control keys of Jabra (<http://www.jabra.co.uk>) USB and Bluetooth devices and offers additional navigation possibilities with a mouse. Another convenience feature is when a call is forwarded, the caller immediately hears hold music.

In addition, there are numerous possibilities for personalising call signaling. For example, different ringtones can be set for all incoming calls or individual contacts. Users who like to listen to their favorite song when they receive an incoming call will now be able to select ringtones from their own files. An individual ringtone can also be set for each caller group. Furthermore, the new version of the user interface also shows the groups to which a user belongs.

Customers using Swyx (<http://www.swyx.com>) through an Apple workstation can now access the optimised version of SwyxDesktop for macOS via the App Store.

About Swyx

Swyx your business.

Swyx operates as a pan-European market leader via two-tier distribution and over 1,200 authorised resellers: the Dortmund based company with dedicated offices in the UK and France sells not only software solutions in six languages, but also has a range of suitable phones and other hardware devices in its product portfolio. Swyx's award-winning unified communications provides not only in-house (CPE) solutions, but also cloud-based variants with well-known partners: Europe already has 750,000 users that rely on Swyx, of which around 10 percent have chosen to use a cloud-based solution. The company currently employs more than 150 staff who are responsible for continually improving the SwyxWare solution for the communication requirements of today and in the future.
