

The UK's first enterprise event for wearables, AR & VR announced

Submitted by: Evolve Digital Publishing

Monday, 3 April 2017

Evolve Media Group today announces the launch of The WAVE (Wearables, AR & VR in Enterprise) Congress (<http://www.wavecongress.com>) – the UK's first enterprise focussed conference for wearables, augmented and virtual reality.

The inaugural event will take place at the Manufacturing Technology Centre (MTC) in Coventry on the 22nd June. The conference is being produced following delegate research from the recent Wearable Technology Show in London, which revealed a need for relevant, business focussed information on technology.

The WAVE Congress (<http://www.wavecongress.com>) is the only dedicated event of its kind in the UK, and will feature leading companies in the space, including Jaguar Land Rover, Airbus, Boeing, Accenture, and Fhoss Technologies. They will discuss and debate cutting edge technology and the latest innovations specifically for the enterprise, and cover real world case studies from businesses deploying connected technology in the UK and overseas.

The event is open for delegate registration and sponsorship opportunities – the website can be found at www.wavecongress.com

John Weir, Event Director, comments "This is a unique opportunity to hear real use cases from businesses deploying connected technology in the workplace, as well as being able to make valuable contacts and understand how wearables, AR & VR are evolving to meet the needs of business in the twenty first century."
