

Landmark Solutions showcases geospatial asset management at Utility Week Live 2017

Submitted by: Peptalk Communications

Tuesday, 23 May 2017

- Utility Week Live, Birmingham NEC, Stand F57 – 23-24 May 2017 -

Landmark Solutions (<http://www.landmarksolutions.co.uk>), part of Landmark Information – the land, property and environmental data company, is demonstrating its capability for delivering high performance geospatial and data solutions to the utilities sector at this year's Utility Week Live event (Stand F57).

Specialists in end-to-end managed big data services, the team will showcase how it supports utilities companies with a broad range of requirements, including geospatial asset management services.

Christopher Gaunt, International Sales Manager, Landmark Solutions said: "We focus our skills on location-based services and analysis to visualise the geographic relationships of key information. For utilities providers who have vast swathes of underground and over-ground assets, we work in partnership with them to combine geospatial and business intelligence so they can quickly visualise their estate and manage it appropriately, and adhere to compliance, health and safety, governance and legislative requirements."

Landmark Solutions has over 20 years' experience in exploiting and commercialising geospatial data. As experts in providing added value services that exploit geospatial, mapping, statistical, address and business intelligence data, Landmark Solutions is Ordnance Survey's largest partner. The group manages over 350 national datasets from 650 suppliers, delivers over two million maps per week and matches 10 million addresses every year.

For more information, visit www.landmarksolutions.co.uk, meet the team during Utility Week Live (23-24 May 2017, NEC Birmingham, Stand F57) or follow on Twitter https://twitter.com/Landmark_S

Ends

Notes to Editors:

- Christopher Gaunt, International Sales Manager and Giles Martin, Technical Data Consultant of Landmark Solutions are available throughout Utility Week Live for briefings. Contact Peppa Sheridan on 07725 121189 to schedule an appointment, or visit stand F57.

About Landmark Information:

Landmark Information uses data and technology to help customers in the residential and commercial property industries streamline their operations and reduce risk. It combines complex property and environmental data into sophisticated risk models and solutions to enable customers to make smarter decisions, and build workflow solutions that allow customers to carry out tasks more efficiently and effectively.

Landmark has long-standing partnerships with customers in the mortgage lending, surveying and conveyancing markets, as well as in land acquisition, property development, estate agency and insurance. The business takes an entrepreneurial approach that fosters constant innovation, growth and talent development across the organisation. Landmark Information is an international business which is headquartered in the UK and is part of Daily Mail and General Trust plc (DMGT).

The group includes Landmark Solutions, which provides a range of secure data and geospatial cloud services to government departments, public sector organisations, utilities providers and other national operations.

Landmark Solutions is registered with a range of public sector purchasing frameworks including G-Cloud 9. In conjunction with its partners at BrambleHub, Landmark Solutions is also accredited on Government Consultancy One framework, Corporate Software Solutions and Local Authority Software Solutions.
