

NHS SBS Adds PKL's Garbage Guzzler and Space Station to Procurement Framework

Submitted by: PKL Ltd

Wednesday, 7 June 2017

NHS Shared Business Services has added two PKL products to its popular procurement framework.

PKL was listed on the NHS SBS framework in February for its modular kitchen solutions, making it quick and easy for public service providers to purchase and hire them.

This month PKL has been celebrating the addition of two new products to the framework: the Space Station and Garbage Guzzler.

The Space Station (<http://www.pkl.co.uk/products/permanent-kitchens/space-station/>) is an innovative self-contained modular servery that allows any catering operation to set up a café facility almost anywhere. Its compact, mobile design enables it to be easily moved between different locations to take advantage of higher footfall, and it can be set up and packed away in a matter of minutes.

The Garbage Guzzler (<https://www.garbageguzzler.com>) is an on-site organic waste digester that can reduce food, cardboard packaging and horticultural waste by 70 per cent in as little as 24 hours.

Both products address issues faced by public sector caterers: the Space Station opens up new revenue streams and is an easy-to-implement 'queue buster' and the Garbage Guzzler helps reduce organic waste costs.

The NHS SBS Framework is a management and procurement service that helps public sector organisations easily source skills and products without going through a long, expensive and complicated tendering process. Every company on the framework has been vetted and checked to make sure they are the best of the best.

PKL Managing Director, Lee Vines, said he was delighted to see the Space Station and Garbage Guzzler added to the NHS SBS Framework.

"I'm really pleased to see these two products added to the framework because I know how much difference they can make to hospital and other public service operations," he said. "The Space Station is the perfect way to bring in new revenue streams from underused spaces and reduce queues at points of congestion. The Garbage Guzzler is a revolutionary product that will change the way caterers think about organic waste, reducing disposal costs and offsetting overheads."

NOTES FOR EDITORS

PKL Company Overview

PKL Group is the UK's leading supplier of modular commercial kitchens, serving a wide range of both public and private sector markets. With hundreds of temporary kitchens and 10,000 items of catering equipment available to hire, the company supports clients during refurbishments, emergencies and events.

PKL also offers a number of permanent modular kitchen solutions including high-spec commercial kitchen buildings which are delivered to site as pre-built modules, ready for quick installation. The company's KitchenPod and Food Cube products have won various industry awards for innovation and have proven popular particularly in the education and leisure sectors.

In addition, PKL offers catering estate management solutions, as well as specialising in major event kitchen complexes such as those used to feed athletes at events such as the Olympic Games. The company's international division also delivers a wide range of specialist kitchen solutions to sites all over the world, from African mining camps to Antarctic research stations.

Established in 1988, PKL's head office is located in Bishops Cleeve, Cheltenham. The company currently employs around 90 staff and has successfully completed over 10,000 temporary kitchen hires worldwide, as well as over 200 permanent kitchen installations.
