

Excel develops Environ range with Co-Lo Racks

Submitted by: Mayflex

Tuesday, 4 July 2017

Excel Networking Solutions (<https://www.excel-networking.com>) - the copper and optical cabling infrastructure provider – has launched a new Environ (<https://www.excel-networking.com/environ-racks>) floor standing rack into their existing portfolio of Networking Racks and Open Frames.

Based on the proven and popular ER series (<https://www.excel-networking.com/products/search?t=environ+er>) chassis, Excel's CL series of multi-compartment floor standing racks are available in 42U or 47U heights, 600mm or 800mm wide, grey, white or black and a choice of 2 or 4 compartments. With this flexibility and with each compartment being created by the use of a full depth dividing panel, the CL Racks have been designed specifically with co-location installations and applications that require enhanced levels of access security in mind. As such, these racks are intended for use by facilities where rack space is being used by different enterprise departments or clients within a shared facility, such as data centres.

Similar to the existing rack portfolio, the CL Series are compatible with the full range of Environ Locking Solutions (<https://www.excel-networking.com/environ-locking-solutions>), enabling customers to choose from digital key code, proximity card or biometric locking configurations.

Neil Payne, Excel Product Manager, commented, "As with all Environ cabinets, racks and open frames, the Co-Location Series is driven by simplicity, performance and flexibility."

Neil continued, "The racks are specifically designed with enhanced security in mind, with entry to the vertical cable management boxes separated from one compartment to another. What's more, the racks come with unique keys for all doors and side panels as standard, and entry to each compartment is restricted to these access zones only to ensure complete protection of infrastructure."

The CL Series racks feature in the new Environ catalogue (https://www.excel-networking.com/sites/default/files/downloads/excel_environ_a5_catalogue_2017.pdf) and the Excel website (<https://www.excel-networking.com/environ-racks>). Tracey Calcutt, Marketing Manager at Excel, commented, "The CL Series is a fantastic addition to the Environ range of Networking Racks and Open Frames. The Environ catalogue (https://www.excel-networking.com/sites/default/files/downloads/excel_environ_a5_catalogue_2017.pdf) has been designed to provide information at the part number level – we've included a useful product selector so you can see at a glance which rack is best for your requirement and there are plenty of close up photographs to see the features of each range."

The CL Racks are now listed on the website, however they will be available to purchase from September 2017. For more information, please contact the Excel team by email at sales@excel-networking.com.

Background Information

Excel is a world-class premium performing end-to-end infrastructure solution – designed, manufactured, supported and delivered – without compromise.

Excel is driven by a team of industry experts, ensuring the latest innovation and manufacturing capabilities are implemented to surpass quality and performance standards, technical compliance and excellence.

Excel structured cabling products constitute an end-to-end solution where performance and ease of installation are prerequisites. With an emphasis on compatibility and standards compliance ‘from cable to rack’, reliability and product availability, Excel is the complete trusted solution. Since the brand was conceived in 1997, Excel has enjoyed formidable growth.

The meteoric rise of the brand reflects a growing demand throughout EMEA for a reliable, standards-compliant, readily available, structured cabling and rack system. Excel is able to deliver this mix as a result of strict European quality assurance and a growing base of distributors and integrators across EMEA, which combine to make the brand an increasingly viable option. With a focus on independent testing and a full 25 year product and application warranty, when installed by an authorised Excel Partner, it's easy to see why this is the system of choice in many government, education, and commercial installations.

Excel has won the following industry awards:

- Network Computing 2016 – Cabling Supplier of the Year
- Network Computing 2015 – Cabling Supplier of the Year
- Network Computing 2014 – Cabling Supplier of the Year
- Network Computing 2013 – Cabling Supplier of the Year
- Network Computing 2012 – Cabling Supplier of the Year
- Network Computing 2011 – Cabling Supplier of the Year
- Comms Expo 2012 – Manufacturer of the Year
