Aryaka's Cloud-First Managed WAN offering now available through leading cloud and security distributor SYNEX Corporation

SAN MATEO, CA. – Nov 2, 2020 – Aryaka® (<https://www.aryaka.com/>), the cloud-first WAN company and #1 end-to-end managed SD-WAN provider, today announced a strategic agreement with SYNEX Corporation (<https://www.synexcorp.com/>) (NYSE: SNX), a leading business process services company. The agreement includes Aryaka SmartServices (<https://www.aryaka.com/smart-services-platform/>) that integrate the best of SD-WAN, WAN Optimization with a scalable global platform, and SaaS integration.

As changes to how enterprises conduct business affect both employees and customers while continuing to shape a new world around us, they accelerate the adoption of cloud-delivered services. Enterprises that previously planned for a measured approach towards their digital transformation initiatives have now been forced to fast-track those projects in a sprint to the cloud. These cloud services and applications deliver most optimally over a cloud-native Software Defined network.

"The SYNEX partner ecosystem is unmatched," said Olen Scott, Senior Vice President of Worldwide Channels at Aryaka. "Adding Aryaka to their arsenal allows partners to offer a complete set of cloud enterprise solutions with the proper network underlay that's best-in-class."

"Aryaka offers the flexibility and simplicity that enterprises and global organizations need in today's fast-changing world," said Reyna Thompson, Senior Vice President, Product Management, North America, SYNEX Corporation. "Our position in the channel and agreement with Aryaka creates new opportunities for global enterprises seeking to seamlessly transform their networks."

Aryaka SmartServices was built with a cloud-first approach to networking in mind, providing organizations with the underlying network critical to cloud adoption and enabling enterprises to seamlessly connect to multiple clouds with ease. Aryaka is also a fully managed service, delivering on quick deployment timelines that are competitive in the industry and have been key to the success of many organizations' digital transformation projects.

SYNEX's deep expertise in cloud and secure networking solutions, as well as its extensive portfolio of leading security, networking and cloud solutions, create strong synergies for the IT partner community.

Aryaka and Check Point have also partnered to form a technology alliance. According to Erez Yarkoni, Global Head of the Telco/Cloud Division at Check Point Software Technologies, "Given today's advanced cyber threats and the expanded remote workforce, it is critical to protect enterprise branch office connections to the cloud. Check Point's CloudGuard Connect is integrated with leading SD-WAN vendors to secure branch Internet connections in just a few minutes. We are excited to work with SYNEX and Aryaka to help enterprises accelerate their digital transformation to the cloud by securing their branch office SD-WAN connectivity."

Additional resources regarding Aryaka's SD-WAN as-a-Service platform can be found within the SYNnex Stellr Marketplace (<https://www.synnecorp.com/stellr/community/marketplace/>) or by reaching out to Aryaka@SYNNEX.com.
