Post-pandemic anxiety is on the rise. For over a year, everyone has seen their lives turned upside down by the coronavirus and with lockdown restrictions easing in some countries, and remaining in place in others, there has never been a better time to tackle and transform negative messages that are causing challenges in everyday life.

Dr Monique Giard is an advocate of the spiritual transmissions of Tao Healing Hands (<https://drsha.com/what-is-tao/what-are-tao-hands/>) because it has also helped in her own life, supporting her son Alex who suffered from social anxiety disorder. Tao Healing Hands blessings helped to transform Alex's condition, and he also became a practitioner which has led to them supporting each other more thoroughly.

Dr Giard says, "I am committed to helping empower people to save lives, one person at a time, for nearly 30 years I worked as a counsellor in private practice, an EMDR therapist, and specialising in trauma recovery, volunteer work as a suicide prevention specialist. In 2014, I trained as a Tao Hands practitioner to help me deal with my own feelings of helplessness and burnout. My own son was diagnosed with social anxiety disorder, he was having a hard time keeping a job as an adult because of his anxiety and panic attacks. He would be in emotional pain and for a long time I felt desperate and powerless not being able to help my son with his pain. I found that when I offered Tao Hands light blessings remotely, my son has become more stable and says he feels calmer, he has also been able to hold down a job."
