

Sage 200cloud users can get invoices paid faster with leading receivables fintech Chaser's new integration

Submitted by: Chaser

Thursday, 8 July 2021

Integration automates receivables tasks, empowering businesses to get invoices paid faster and boost cash flow with payment reminders that don't get ignored.

Chaser, the global credit control automation platform and service provider, today released its integration with Sage 200cloud, a market leader in cloud business management solutions, after releasing ChaserImport earlier this month. This new integration makes it easy and affordable for businesses to deeply personalise and automate their accounts receivables and credit control processes.

Previously, Chaser offered integrations with Sage Business Cloud Accounting only, but a growing number of Sage 200cloud users have been requesting the functionality. Using Chaser, Sage 200cloud users can now automatically reconcile their transactions to match their accounts in seconds, so that they can focus on the work that matters most. They can easily carry out automated invoice payment chasing whilst ensuring every message looks hand-typed, and maintaining great customer service. This process saves Chaser's current customers 15+ hours weekly and ensures that no unpaid invoice slips through the cracks. To view a full run-through of the integration and features available, join the virtual launch event here (<https://hubs.li/H0RQC4d0>).

Benefits and features available through this integration include:

- Cloud-to cloud integration between Sage 200cloud and Chaser.
- Personalised invoice payment chasing, adapted to the user's brand and tone of voice.
- Invoice and payment reconciliation in both the Chaser and Sage 200cloud.
- Automated "thank you for paying" emails.
- Easy tracking of overdue invoices per customer.
- Centralised hub summarising all payment chasing activity, including customer replies.
- Access to Chaser's debt collection service.
- Dedicated payment portal providing a summary of all invoices paid and due, multiple payment options, and the option to request payment plans.
- Ability to offer payment plans to customers, customise amounts and dates, and automatically chase installments
- Credit checking in-app.

"We are delighted to work with Sage to automate invoice payments and make sure that our customers are paid on time." Sonia Dorais, CEO of Chaser, has said. "We believe that all businesses have the confidence they will get paid for their work through effective credit control and accounts receivable management. By integrating with Sage in this way, we are allowing our joint customers to seamlessly chase invoices end to end, helping them operate more efficiently and effectively and boosting cash flow."
