Company Recognized for Excellence in Helping Enterprises Issue and Manage the Lifecycles of Digital Certificates and Keys to Secure Every Identity, Device, and Application

ROSELAND, NJ —September 30, 2021 – Sectigo®, a global provider of digital certificates and automated certificate lifecycle management solutions, today announced it was named Overall Encryption Solution Provider of the Year in the 2021 CyberSecurity Breakthrough Awards. The awards, hosted by leading market intelligence firm Tech Breakthrough, highlight the world’s best information security companies, products, and people.

“We are honored to be recognized by the CyberSecurity Breakthrough Awards for our proven, innovative approach to encryption, which enables enterprises to secure their digital infrastructure at scale,” said Jason Soroko, CTO of Public Key Infrastructure (PKI) at Sectigo. “In today’s ever-expanding digital world, enterprises are adding more and more devices, users, and applications. This has caused the volume of digital certificates used to enable encryption to grow exponentially to ensure enterprises maintain a secure environment. An automated certificate lifecycle management tool to manage the growing volume of certificates is critical to accomplishing this.”

A panel of senior-level, experienced cybersecurity professionals including journalists, analysts and technology executives selected Sectigo from more than 4,000 nominations worldwide.

Sectigo is the trusted security and encryption partner to the world's largest organizations, and throughout its 20-year history, it has issued and helped manage billions of digital certificates across the globe. The company helps enterprises address their encryption challenges with its flagship certificate lifecycle management solution, Sectigo Certificate Manager (SCM).

SCM is a fully automated certificate issuance and management platform purpose-built for today's enterprises. It provides customers with complete visibility and lifecycle control to quickly deploy, revoke, and replace any public or private PKI certificates and keys, all from a single "pane of glass" platform. It also automates tasks, enforces compliance and control, minimizes person-hours, scales up to manage billions of certificates, and has over 28 native integrations with leading technologies.

Previously Sectigo also won the 2020 RemoteTech Breakthrough Award for Authentication Management Solution of the Year, and the 2019 IoT Device Security Solution of the Year in the CyberSecurity Breakthrough Awards. Earlier this year, the company was a Gold Winner for New Security Software Product-Service of the Year in the 2021 Cyber Security Global Excellence Awards.
