---

Did you know that in the wild a Norwegian Spruce can live up to 300 years? Yet each year, we invite one into our homes for up to just 6 weeks, before throwing it back out into the cold. This year we're encouraging you to go potted. Invite one of our trees into your home, dress him up for Christmas, and then keep him happy in your garden until it's his time to shine again!

We want to help bring back a little of that childhood magic, with our Christmas trees delivered straight to your door - as if from the big man himself! No more bickering over which tree looks fuller. Forget that precarious drive home with your boot open and half a tree hanging out. No need to worry about hoovering out your car.

At Beards & Daisies our team of experienced elves will pick you the bushiest, most gorgeous green potted Christmas tree and deliver it straight to your door. Leaving you plenty of time to get on with all of the festivities!

Whether you're looking for a mini tree to brighten up a sideboard or a tall 4 or 6 footer, ready to steal the show - with plenty of space for Santa to leave your presents.
