North Lincolnshire Council Selects ubitricity to Provide Residential Public EV Charging Infrastructure

North Lincolnshire Council partners with ubitricity to deliver a network of 35 on-street electric vehicle (EV) charge points across the region

London & Scunthorpe, UK – Thursday 23rd March 2023 - North Lincolnshire Council has appointed ubitricity (<https://ubitricity.com/>), the UK's leading charge point operator with a network of over 6,500 public charge points, to install a network of 35 on-street electric vehicle (EV) charge points in North Lincolnshire as part of the council's drive towards A Green Future. Through this partnership, ubitricity, a wholly owned subsidiary of Shell, will install and manage the public charging infrastructure, which will be made up of a combination of bollard and street lamppost chargers. The charge points will charge at a speed of up to 5kW and each take just under 2 hours to install. The council has asked residents to suggest charge point installation locations. Residents can register their interest here (<https://forms.office.com/e/vpC9Qaa8cn>).

The roll-out is planned for residential communities where the majority of residents park on the street, allowing residents to easily charge hybrid and electric vehicles on the street where they live. A lack of accessible public EV charging points is a common barrier to EV adoption. A study commissioned by the Department for Transport published in March 2022 showed that the public wants to charge their vehicles at or near home, which can be difficult for the 8 million households in the UK don't have access to off-street or private parking.

Cllr Rob Waltham, leader of North Lincolnshire Council, said: "Residents are now becoming more conscious of their carbon footprint, with more people converting to electric vehicles to contribute to improving emission levels. We are excited to implement this government-led initiative and enable easy access to charge points for residents. These new chargers will be installed where off-street parking is not available and will use the power supply from streetlights – now we need to know where residents would like to see them installed."

In 2022 North Lincolnshire Council pledged to become carbon neutral by 2030. In 2023, the council unveiled its A Greener Future (<https://www.gov.uk/government/publications/25-year-environment-plan>) environmental programme, which laid out a roadmap to tackle its carbon footprint. One of the key aims of this plan, which also includes developing the city's cycling and walking infrastructure, was to increase EV adoption in the area.

"The momentum of EV infrastructure deployments across the UK continues to build, with more and more councils and local authorities helping residents to make the shift to greener modes of transport," said Toby Butler, UK Managing Director of ubitricity. "We're delighted to have added North Lincolnshire Council to our growing list of council partners, paving the way for residents who want to switch to EV."

Cautionary Note

The companies in which Shell plc directly and indirectly owns investments are separate legal entities. In this press release "Shell", "Shell Group" and "Group" are sometimes used for convenience where references are made to Shell plc and its subsidiaries in general. Likewise, the words "we", "us" and "our" are also used to refer to Shell plc and its subsidiaries in general or to those who work for them. These terms are also used where no useful purpose is served by identifying the particular entity or entities. "Subsidiaries", "Shell subsidiaries" and "Shell companies" as used in this press release refer to entities over which Shell plc either directly or indirectly has control. Entities and unincorporated arrangements over which Shell has joint control are generally referred to as "joint ventures" and "joint operations", respectively.

"Joint-ventures" and "joint operations" are collectively referred to as "joint arrangements".

Entities over which Shell has significant influence but neither control nor joint control are referred to as "associates". The term "Shell interest" is used for convenience to indicate the direct and/or indirect ownership interest held by Shell in an entity or unincorporated joint arrangement, after exclusion of all third-party interest.

Forward-Looking Statements

This press release contains forward-looking statements (within the meaning of the U.S. Private Securities Litigation Reform Act of 1995) concerning the financial condition, results of operations and businesses of Shell. All statements other than statements of historical fact are, or may be deemed to be, forward-looking statements. Forward-looking statements are statements of future expectations that are based on management's current expectations and assumptions and involve known and unknown risks and uncertainties that could cause actual results, performance, or events to differ materially from those expressed or implied in these statements. Forward-looking statements include, among other things, statements concerning the potential exposure of Shell to market risks and statements expressing management's expectations, beliefs, estimates, forecasts, projections and assumptions. These

forward-looking statements are identified by their use of terms and phrases such as “aim”, “ambition”, “anticipate”, “believe”, “could”, “estimate”, “expect”, “goals”, “intend”, “may”, “milestones”, “objectives”, “outlook”, “plan”, “probably”, “project”, “risks”, “schedule”, “seek”, “should”, “target”, “will” and similar terms and phrases. There are a number of factors that could affect the future operations of Shell and could cause those results to differ materially from those expressed in the forward-looking statements included in this press release, including (without limitation): (a) price fluctuations in crude oil and natural gas; (b) changes in demand for Shell’s products; (c) currency fluctuations; (d) drilling and production results; (e) reserves estimates; (f) loss of market share and industry competition; (g) environmental and physical risks; (h) risks associated with the identification of suitable potential acquisition properties and targets, and successful negotiation and completion of such transactions; (i) the risk of doing business in developing countries and countries subject to international sanctions; (j) legislative, judicial, fiscal and regulatory developments including regulatory measures addressing climate change; (k) economic and financial market conditions in various countries and regions; (l) political risks, including the risks of expropriation and renegotiation of the terms of contracts with governmental entities, delays or advancements in the approval of projects and delays in the reimbursement for shared costs; (m) risks associated with the impact of pandemics, such as the COVID-19 (coronavirus) outbreak; and (n) changes in trading conditions. No assurance is provided that future dividend payments will match or exceed previous dividend payments. All forward-looking statements contained in this press release are expressly qualified in their entirety by the cautionary statements contained or referred to in this section. Readers should not place undue reliance on forward-looking statements. Additional risk factors that may affect future results are contained in Shell plc’s Form 20-F for the year ended December 31, 2022 (available at www.shell.com/investor and www.sec.gov). These risk factors also expressly qualify all forward-looking statements contained in this press release and should be considered by the reader. Each forward-looking statement speaks only as of the date of this press release, 23/03/2023. Neither Shell plc nor any of its subsidiaries undertake any obligation to publicly update or revise any forward-looking statement as a result of new information, future events or other information. In light of these risks, results could differ materially from those stated, implied or inferred from the forward-looking statements contained in this press release.

Shell’s net carbon intensity

Also, in this press release we may refer to Shell’s “Net Carbon Intensity”, which include Shell’s carbon emissions from the production of our energy products, our suppliers’ carbon emissions in supplying energy for that production and our customers’ carbon emissions associated with their use of the energy products we sell. Shell only controls its own emissions. The use of the term Shell’s “Net Carbon Intensity” is for convenience only and not intended to suggest these emissions are those of Shell plc or its subsidiaries.

Shell’s net-Zero Emissions Target

Shell’s operating plan, outlook and budgets are forecasted for a ten-year period and are updated every year. They reflect the current economic environment and what we can reasonably expect to see over the next ten years. Accordingly, they reflect our Scope 1, Scope 2 and Net Carbon Intensity (NCI) targets over the next ten years. However, Shell’s operating plans cannot reflect our 2050 net-zero emissions target and 2035 NCI target, as these targets are currently outside our planning period. In the future, as

society moves towards net-zero emissions, we expect Shell's operating plans to reflect this movement. However, if society is not net zero in 2050, as of today, there would be significant risk that Shell may not meet this target.

Forward Looking Non-GAAP measures

This press release may contain certain forward-looking non-GAAP measures such as cash capital expenditure and divestments. We are unable to provide a reconciliation of these forward-looking Non-GAAP measures to the most comparable GAAP financial measures because certain information needed to reconcile those Non-GAAP measures to the most comparable GAAP financial measures is dependent on future events some of which are outside the control of Shell, such as oil and gas prices, interest rates and exchange rates. Moreover, estimating such GAAP measures with the required precision necessary to provide a meaningful reconciliation is extremely difficult and could not be accomplished without unreasonable effort. Non-GAAP measures in respect of future periods which cannot be reconciled to the most comparable GAAP financial measure are calculated in a manner which is consistent with the accounting policies applied in Shell plc's consolidated financial statements.
