

Climb Channel Solutions Expands Malwarebytes Partnership to Include Offering for VARs in the UK and Ireland

Submitted by: Climb Channel Solutions

Tuesday, 28 March 2023

Ashburton, Devon (28th March 2023) – Climb Channel Solutions, an international specialty technology distributor and wholly-owned subsidiary of Climb Global Solutions, Inc. (NASDAQ: CLMB) announced the expansion of their partnership with Malwarebytes, a global leader in real-time cyber protection to include the full Malwarebytes for business portfolio for VARs in the UK and Ireland.

This expands the existing MSP partnership between Climb and Malwarebytes, allowing more partners to offer this cyber protection solution to their customers. With additional threat prevention modules and services such as DNS filtering and managed detection and response (MDR), partners can offer the right product or service to each customer, tailored to their specific needs.

"As business owners around the world have unfortunately experienced, the consequences of a ransomware attack can be devastating to their operations and even their existence. That's why we are excited to announce our partnership with Climb Channel Solutions," commented Paul Sexton, Channel Manager UK&I at Malwarebytes.

He continued, "Climb Channel Solutions is the ideal partner to help us expand the reach of our cloud-based cybersecurity solutions to customers and value-added resellers (VARs) throughout the United Kingdom and Ireland to streamline their cybersecurity offerings with effective and award-winning protection."

The importance of a robust cyber-security solution was recently highlighted by the Malwarebytes 2023 State of Malware (<https://try.malwarebytes.com/2023-state-of-malware/>) report. The report found that 71% of companies worldwide had been affected by ransomware last year, while over 22,500 new vulnerabilities were found and recorded. These rising stats show the continuous evolution of the threat landscape, forcing organizations to focus on not only malware prevention but also remediation.

"We're excited to expand our Malwarebytes offering to include the full portfolio for VARs as well as MSPs," comments Jane Silk, VP of Sales EMEA, Climb Channel Solutions. "Our partnership with Malwarebytes has grown in a short time and our teams enjoy working together to ensure we can offer the best solutions to our customers."
