Next-Gen Collagen Supplement Sets New Standard with World-Leading Clinical Results

LONDON — In a major breakthrough for the beauty and wellness industry, Face Envy London proudly announces the launch of its patented liquid marine collagen tripeptide (<https://www.faceenvylondon.com>) supplement, enriched with hyaluronic acid and vitamin C. This game-changing product is redefining skincare by delivering clinical results that surpass not only other collagen supplements (<https://www.faceenvylondon.com>) but also the most advanced anti-aging creams on the market.

Headline-Grabbing Results:

- +52% Increase in Skin Collagen Density in Just 28 Days

Clinical trials reveal a ground-breaking result in skin volume and density, setting a new benchmark in the collagen supplement and skincare industry. See dermal scans here (<https://www.faceenvylondon.com/pages/clinical-trials>)

- +400% More Absorption than Collagen Peptides

Our advanced Collagen Tripeptides (<https://www.faceenvylondon.com>) and patented ingredients ensure faster, more effective results than Collagen Peptides (<https://www.faceenvylondon.com>). The smaller particles help bypass digestion, absorbed by the bloodstream to deeply penetrate the dermis for maximum benefits.

- 100% Approval Rating for Product Efficiency

Clinical trial participants rated our supplement with a perfect score for its transformative skincare benefits. See also other incredible scores on our website such as a 96% user rating for anti-wrinkle effect and a 100% rating for firming.

- Potency Equivalent to 40,000mg of Collagen Peptides

Thanks to our superior absorption technology using collagen tripeptides and patented ingredients, each 8,000mg sachet delivers the equivalent benefits of 40,000mg of collagen peptides used by other brands.

Full-Body Firming in One Daily Sachet

Our collagen supplement doesn't just target the face—it provides full-body firming, hydration, and rejuvenation. Clinically proven to enhance skin firmness by over +20% in just 28 days and has been user rated as 100% Firming.

Setting a New Standard in Skincare:

"We are incredibly proud of the results our collagen supplement has achieved," said Rebecca Anstey, Director of Anstey Group Ltd. "Our commitment to excellence and innovation has led to the launch of a product that exceeds the highest expectations in collagen supplements and skincare."
