IP Telephony & Communications Solutions Zone at Networks telecom sponsored by Aculab

London, 19 February 2001 - Networks telecom 2001 (1), the event for networks and networked solutions for IT, telecom and the Internet, have signed a deal with Aculab to sponsor the IP Telephony & Communications Solutions Zone.

Aculab, as the leading provider of open standards based enabling technology for the communications market, produces a computer telephony product portfolio that satisfies the DSP resource and global digital connectivity requirements of developers and system integrators. Sponsorship of the IP Telephony & Communications Solutions Zone highlights Aculab's current activities in this area.

Jane Murphy, Portfolio Director for Networks telecom comments: "We are delighted to have the backing of Aculab at Networks telecom 2001. The IP Telephony & Communications Solutions Zone will showcase all the latest cutting edge technology for next generation communications solutions, including the latest web technologies, e-mail handling, predictive diallers and remote access products."

Chris Gravett, Sales & Marketing Director at Aculab said: "Sponsoring the IP Telephony & Communications Solutions Zone reinforces our commitment to satisfying this exciting market and supporting developers in their bid to capitalise on the many opportunities that exist. The zone is set to provide an insight into the latest technologies through a number of companies, including many "Connected with Aculab" partners, who will be revealing their latest developments."

Along with the Internet Security zone, Networks telecom 2001 will comprehensively present the architecture of the 'networks future' by featuring all of the industry's key issues under one roof. Visitors will be able to optimise their time by visiting specific focus areas and features on the show floor. These areas will help visitors drill-down to their specific niche area and quickly locate suppliers and partners that fit their business needs.

The event, which takes place from 26-28 June 2001 at Birmingham NEC, will focus on many industry hot topics, including the all-business-critical Internet Security issue.

Notes to Editors:

(1) Networks telecom 2000 was held at the NEC Birmingham 27th-29th June. Over 23 000 people attended the show (ABC audited) with approximately 600 exhibitors.

or telephone 020 8987 7601.

## About Aculab

Through a customer-focused approach to development, Aculab has produced a computer telephony (CT) product portfolio that satisfies the speech resource and global digital connectivity requirements of developers and system integrators. CT applications utilising Aculab's components can handle real-time telephony, through an extensive range of resources and signalling systems.

The evolution of Aculab's generic API, to provide a consistent programming interface, reduces the integration time of a combination of technologies including Text-To-Speech (TTS), Automatic Speech Recognition (ASR), conferencing and fax. Collectively through supporting a broad range of industry standards and operating systems, Aculab can provide the products needed when quality and performance cannot be compromised.

Aculab's head office is located in Milton Keynes, UK with offices in North America, Germany and Australia. Website: <http://www.aculab.com>
