---

Going to Infosecurity?

...then visit GlobalSign at stand G016

GlobalSign would like to invite journalists to come along and meet the team on their stand to discuss a variety of security issues, such as:

- M-Commerce Security
- Flexible Outsourced Corporate PKI Solutions
- Vodafone pilot projects
- Virtual Signatures
- Certification applications
- Digital Certificates
- Authentication
- Encryption

Vodafone recently acquired a 40% stake in GlobalSign to form a strategic partnership in m-commerce security, which is certain to become an integral part of GlobalSign's future. Most recently they have released their new service, MobileSign, a Wireless Transport Layer security encryption that can be installed on WAP servers.

To ensure that the appropriate team member is available to speak with you scheduled meetings can be made through Emma Gurd at Bluegrass on 01264 323141 or by e-mailing [emma.gurd@bluegrass.co.uk](mailto:emma.gurd@bluegrass.co.uk).

About GlobalSign:

- GlobalSign, founded in 1996, is a fast-growing international Trust Services Provider, headquartered in Brussels.
- GlobalSign is active worldwide as a Certification Authority and offers online services for creating and managing digital certificates for signed/sealed e-mail messaging and for fully authenticated and confidential e-commerce.
- GlobalSign develops flexible corporate PKI-solutions for all types of companies, and offers various certification applications such as m-commerce security, WAP, trust labels and timestamping.
- GlobalSign is developing a pan-European network of trust throughout Europe, Asia and America. Today GlobalSign is present in Benelux, France, Germany, UK, Italy, India and Chile, amongst others, and it continually integrates other partners in and outside Europe into this network (now 20

countries).

- GlobalSign is also the official Certification Authority for the European Commission and works with strategic partners such as Microsoft, Netscape, PricewaterhouseCoopers, IBM Global Network, Siemens Nixdorf and Oracle.
