

# LAMMTARA INDUSTRIES EXHIBIT 'ANY PLATFORM' COMMUNICATION FOR REMOTE AND MOBILE USERS

Submitted by: MCC International Ltd

Friday, 11 May 2001

---

Lammtara Industries, provider of managed access to applications and databases via WAP, GPRS (2.5 & 3G technologies), SMS, WEB platforms and Voice Service Provision (VSP), today announced it would be exhibiting its suite of solutions at Internet World UK 2001. This event is an important platform for delegates to evaluate latest findings and practices within Internet development and how the future of the Internet will shape business and personal life. The Internet is still the biggest opportunity facing every single business in Britain.

Having recently been awarded a Small Business Service Smart award, securing the highest amount of development money ever issued, Lammtara Industries offers a structured and proven approach for solutions to mobile and remote working. Managing complete access to applications and Internet/Intranet databases, Lammtara Industries utilises some of the most advanced technology platforms currently available, including WAP and GPRS.

Current customers, including Cadbury Schweppes, BP and VW, reflect Lammtara's success to date in the corporate sector. Strong partnerships with service companies including Logica, Cellstar and Kingston Telecom will continue this, as well as address the SME space where the need for affordable access solutions is paramount.

The attendance of Lammtara Industries at this key UK event demonstrates commitment to its own business development, particularly in the Voice Application Service Provider (VASP) sector, and ensures that by visiting Internet World, UK and European businesses have the chance to gain knowledge and understanding of the wireless and mobile technological services available.

## About Lammtara Industries

Lammtara provides managed access to applications and databases via WAP, GPRS (2.5 and 3G technologies), SMS, WEB platforms and Voice Service Provision (VSP). These applications allow customers to provide mobile and remote workers the ability to view, manage and maintain content and data from the ever-growing range of devices.

Lammtara has an in-house academy of engineers qualified in developing applications and facilitating them via the many communication platforms. They work closely with commercial partners, such as Logica and Kingston Telecommunications. Such partnerships enable the delivery of access solutions for Corporations, including BP and Cadbury Schweppes, as well as SME customers.
