

## Lowest 'Genuine' Price in the UK

Submitted by: Bell Science

Friday, 3 May 2002

---

Bell Science, the revolutionary technology solutions provider has come up with a novel and ecologically friendly way for individuals & organisations in obtaining a new PC and disposing of their old one without seriously denting a hole in their pocket. Bell Science are offering 2 state-of-the-art multi media personal computers with Intel 1GHz and 1.7GHz Pentium 4 Processors respectively. Network ready the PC's retail from an amazingly low starting price of £255.31 ex VAT.

The launch of the Swap4new ProMedia 5770 and 4470 PC's bring 3 major benefits: -

- 1) Boosts staff morale by upgrading PC's to a more sophisticated model
- 2) Removing headache of disposing of old equipment
- 3) Enabling customer to become a 'good corporate citizen' by donating the "swapped" PC to a charitable cause.

Bell Science believes advancement in technology leads to 'economies of scale' and therefore lower pricing which must be passed on. A sophisticated multi media system would usually cost between £700 - £1000, however by cutting out the 'middleman', Bell Science is able to pass on this cost benefit to the customer.

Bell Science' remarkable service - work ethic also guarantees a 48 hour turnaround\* (upgrade) once an order is received.

The Swap4new offering boasts the following:

- Swap old PC for a Brand New ProMedia 5770 or 4470 with 5 Years Original Parts & Labour Warranty starting from only £299.99 inc VAT
- FREE Upgrade to a 16x Speed DVD ROM on orders before April 30, 2002
- Guaranteed 48hr turnaround\*

- Pay by cheque, Bank transfer or credit card
- Old PC donated to Charities and Nurseries
- Collection & delivery only £39.95+VAT (£46.94 inc)
- Upgrade options available

\*Available as upgrade
