Overland Data at Networks Telecom 2002

Submitted by: Strategic Public Relations Ltd
Thursday, 9 May 2002

Hall 17, Stand U55

Overland Data, a leading provider of automated tape storage solutions for medium and large enterprises, will be demonstrating the first of its new storage management software products at Networks Telecom, 25-27 June 2002. This is the first time this product will be shown in Europe. This product will give organisations the intelligence to proactively manage network attached storage (NAS) and direct attached storage (DAS) environments.

In addition to demonstrating its new software line, the company will be presenting its current Neo product range of fibre channel based tape libraries. Neo 2000 and Neo 4000 provide High Availability as the first solutions of their kind to be equipped with 1 or 2 gigabit fibre channel interfaces for primary or secondary SAN connections. They are thus ideal for all environments requiring maximum protection against downtime and non-stop system operation. Thanks to Overland's Distributed Robotic Architecture (DRA), a variety of different tape formats, such as DLT8000, SDLT and LTO, can be combined effortlessly within a single library.

A fully operational mixed module Neo will feature prominently in the Ideal Storage Solutions Centre at the show, an area that aims to demonstrate to users the latest storage technologies in an open, neutral environment.

Products designed for medium-sized and small companies will also be exhibited on the Overland stand. These include the LoaderXpress, which is aimed at the cost-sensitive end of the market and is now available with LTO drives, as well as the AIT based LibraryPro.

About Overland

Overland Data, Inc. (NASDAQ: OVRL) is a global supplier of innovative data storage and storage automation solutions for computer networks. The Company's reputation for delivering high availability products, as well as its award-winning SmartScale Storage® architecture which set the standard for intelligent automated storage and scalability, has established Overland as a leader in the mid-range tape automation market. Overland sells its products worldwide through leading OEMs, commercial distributors, storage integrators and value-added resellers.
