

# Arkeia Demonstrates New Backup Solutions at Networks 2002

Submitted by: Strategic Public Relations Ltd

Friday, 21 June 2002

---

Date : Tuesday 25th - Thursday 27th June 2002

Venue : NEC, Birmingham

Stand: SC25 (NCE Computer Group booth)

Arkeia Corp., a supplier of enterprise network backup software, will be showcasing at this year's Networks Telecom 2002 show, in Birmingham its new beta version of its Arkeia 5 backup software and Virtual Backup Server Solution.

## Arkeia 5

Arkeia 5 features smooth network integration, including automatic hardware detection as well as a new user-friendly interface. Arkeia 5 is now scalable for SME businesses through to large enterprises. Its new modular plugin structure can simplify specialised tasks, such as backup for open file databases and online servers. To simplify data security and reduce costs, Arkeia 5 can channel multiple servers to a single tape library.

## Arkeia's Virtual Backup Server solution

Arkeia's Virtual Backup Server solution provides a new array of local and remote data protection services especially adapted to ISPs, telecom specialists and cable operators. By using Arkeia's Virtual Server capacity, ISPs can offer complementary services to current clients, plus attract new business from growing companies that want to avoid expensive hardware purchases.

If you would like to talk with an Arkeia representative regarding the new products or corporate strategies, please do not hesitate to contact me.
