

One Stop Shop for Jewellery/Gift Manufacturers at Spring Fair 2003

Submitted by: Ainsworth Maguire

Thursday, 5 December 2002

For the first time at Spring Fair, jewellery and quality gift manufacturers will be able to see Siro Lasertech, laser engraving and welding equipment alongside Yasui vacuum casting machines and an extensive range of Otec deburring and polishing systems all on the Finishing Techniques stand R50, Hall 17.

Finishing Techniques has been the sole UK supplier of Otec for many years and Spring Fair marks the company's new exclusive UK deals to supply Siro Lasertech and Yasui equipment. "Our aim is to provide the complete one-stop shop for manufacturers, from making wax patterns to casting fine pieces, through to deburring and polishing and final engraving. We have machines for everyone from small workshops to large scale producers," commented managing director, Jonathan Dean.

This is highlighted by the new Otec ECOmaxi on show for the first time. The ECOmaxi offers the small producer a three-in-one low-cost tabletop solution to finishing. An innovative mechanism allows interchangeable bowls for magnetic polishing, wet grinding and dry polishing using the same device. Full ECOmaxi specifications will be released when it arrives in the UK in the new year.

Whatever solution manufacturers are looking for Jonathan promises a warm welcome and wealth of advice on the Finishing Techniques stand R50, Hall 17.
