Wednesday, 15 January 2003

---

Tamworth, Staffordshire, UK - 15th January 2003 - Vector Networks <http://www.vector-networks.com> a provider of desktop management solutions that reduce the cost of owning PCs, is designated Best Systems Management Tool finalist in the 2003 Codie Awards competition for its PC-Duo Enterprise software. The Codie Awards is held by the Software & Information Industry Association (SIIA) and is the only peer-recognition awards programme in the software industry. PC-Duo Enterprise was carefully selected from a list of 14 entrants by independent judges who are key industry media representatives.

Ken Wasch, SIIA President, states, "The digital code and content industry is as innovative and vibrant as ever. For a company to make the cut as a finalist is a terrific achievement. Simply put, each finalist is a leader in its field. We are extremely proud to recognise the creativity and hard work that has brought them to this point."

Martin Bradley, Vice President, Vector Networks remarks, "It is extremely gratifying to know that my industry peers recognise the quality of work and the dedicated team that stand behind the PC-Duo Enterprise product. Clearly, Vector Networks is in step with its goal of providing its customers with the most comprehensive, productive and cost-effective software tool in the desktop management marketplace."

The final round of judging will be determined by the SIIA member company product selections. Each member company may cast one vote. The 2003 Codie Award winners will be announced at a Gala event May 6, 2003 at the Palace Hotel in San Francisco.

## About PC-Duo Enterprise

PC-Duo Enterprise is a first-of-its-kind modular desktop management suite that provides customers with the flexibility to purchase and implement functional modules as required. The suite includes Inventory Management, Software Metering, Software Distribution, Diagnostics, Remote Control and web-based HelpDesk Issue Tracking modules. There are 39 different combinations available to meet the specific needs of corporations. This flexibility may save customers thousands of dollars since there is no need to buy software whose functionality overlaps with existing software or performs unnecessary functions for their organisation. The product is fully expandable so future needs can be easily met.

## About Vector Networks

Vector Networks Group specialises in the development and marketing of Windows-based desktop management software for the enterprise market. Through Vector's ever-increasing reseller channel and direct sales, the company services customers in over 40 countries with software installed on over 3.5 million PCs. Vector Networks is positioned for exponential growth with its focus on acquiring products and companies

with complementary technology. Development over the coming months will be high paced to provide additional modules that further expand the functionality of the PC-Duo Enterprise product.
