

Premier League Security from Elero Motorisation

Submitted by: Ainsworth Maguire

Wednesday, 12 February 2003

Birmingham and West Brom may be Premier League rivals, but when Birmingham needed additional security they turned to Bromwich based Sandwell Doors. Two large seven metre by three metre shutters, finished in City blue, have been installed at St Andrew's Stadium. Both have Elero motors and controls for easy, efficient and reliable operation.

The new shutters control access to the ticket office and the corporate hospitality suites. Both have heavy duty steel laths in a plastisol finish. The Elero motors driving the shutters provide push button control and remove the hard labour in opening and closing the heavy shutters. The heavy duty DFM direct drive external motors are controlled by external key switch. Elero have the lowest returns rate within the shutter industry and their motors carry a five year guarantee.

Sandwell have been trading for over 16 years and have been a supplier to Birmingham City for over five years. This work has involved installing new shutters and maintaining systems installed by a previous contractor. "We have found the Elero motors exceptionally reliable and have used these to upgrade the performance of many of the older shutters on site as their drives wore out or became troublesome," explained Sandwell's managing director Tony Smith.
