Addition of Graham Welch as EMEA Sales Director fuels company growth into European network security market

InfoSecurity Europe, London Olympia, UK - April 29th, 2003 - Sourcefire, Inc., a leader in protecting enterprises and government organisations against the threat of network attacks and misuse, today announced the appointment of Graham Welch to its experienced sales team. Graham Welch, who has been appointed as Sourcefire's EMEA Sales Director, will be responsible for continuing to establish and build Sourcefire's market presence and sales operation to both EMEA end users and channel partners.

"As an emerging leader in network security, we felt it essential to bring the best possible sales talent to Sourcefire. Graham will ensure Sourcefire's strong market presence and dedication to partners as we continue to grow," said Tom McDonough, Chief Operating Officer of Sourcefire. "Adding Graham puts Sourcefire in a great position to satisfy the increasing demand for network security from both end users and channel partners in Europe, the Middle East, and Africa."

Welch joins Sourcefire, Inc. with 15 years experience in both channel and direct technology sales in Europe. Welch served with RSA Security as Area Vice President for UK, Ireland, France and Benelux where he was responsible for nearly 50% of RSA's EMEA revenues. While at RSA Security, he built the UK business from $5 million per annum to more than $25 million in just 5 years. Prior to joining RSA, Welch also held major account sales and channel positions at technology manufacturer Tektronix Inc. and UK distributor Golden Gate.

"I joined Sourcefire because they are building a great reputation in Europe and are consistently proving that they have a superior solution to the challenges of network intrusion management," said Graham Welch, Director of Sales for EMEA, "I am very excited to be a part of this growing company."

"The task of elevating Sourcefire into a global IDS powerhouse requires an aggressive growth model, and Graham is a key role in executing this strategy," added McDonough. "I'm confident that he will deliver on Sourcefire's reputation as a network security leader."
