

# eRacks contributes Web & Mail Server to Orange County Linux Users Group

Submitted by: eRacks

Thursday, 9 October 2003

---

Laguna Beach, CA October 8, 2003 - eRacks Open Source Systems today announced its support of the OC Linux Users Group (OCLUG) with the recent contribution of a powerful new eRacks Web & Mail rackmount server configured to run Red Hat(TM) Linux 9, Apache, Mailman mailing list software, MySQL, Perl, and PHP.

The OCLUG is a non-profit organization, whose goal is to promote and discuss technologies and solutions relating to all flavors of UNIX, including Linux and Free/Net/Open BSD, with an emphasis on Open Source. Registration is free, and both the meetings and the technical discussion mailing list are open to anyone.

There are currently about 110 members on the mailing list and average meeting attendance is approximately 40-50 people. More information on OCLUG can be found at [www.oclug.org](http://www.oclug.org).

eRacks strives to promote open source software and solutions and is proud to have been selected by the OCLUG to provide this mission critical server. The company also has Open Source experts who have served or continue to serve in various capacities at the OCLUG.

## About eRacks Open Source Systems

eRacks is a leading provider of Open Source solutions. The company features its own line of rackmount computer servers, desktops, and laptops and offers a wide array of services including Open Source enterprise migration, security, and network architecture services. More information
