Tuesday, 4 November 2003

London, UK – November 4, 2003 – iWay Software, a wholly owned division of Information Builders and the world's leading adapter vendor, today announced that PeopleSoft, Inc. has certified the integration of the iWay Intelligent Adapter for PeopleSoft® Enterprise for PeopleSoft AppConnect 8.4. With codeless access to all PeopleSoft integration points, iWay Intelligent Adapter for PeopleSoft Enterprise accelerates integration projects and minimises the associated risks.

"This certification assures PeopleSoft customers that there is an affordable, secure, and reliable solution that leverages their PeopleSoft investment and integrates it with over 250 enterprise information assets," said Glenn Sulzberg, director of PeopleSoft's Partner Integration Team.

iWay's Intelligent Adapter works with PeopleTools® Component Interfaces (CI), Integration Broker and SOAP to CI interface. With inbound/outbound and synchronous/asynchronous access, the iWay Intelligent Adapter for PeopleSoft Enterprise enables maximum flexibility in integrating the clients' PeopleSoft system with other enterprise systems. It allows organisations, integrators, and other software vendors to easily create connections to PeopleSoft interfaces that are reusable on Java™ and .NET platforms, as SOAP-based Web services, and with many popular broker and messaging technologies, including iWay's Integration Platform, which has robust transformation and intelligent routing capabilities.

The iWay Intelligent Adapter for PeopleSoft Enterprise is a key component of iWay's Universal Adapter Framework, a collection of adapters for integrating over 250 enterprise systems. The Adapter enables integration with ERP, CRM SCM, and over 80 relational and non-relational databases including VSAM, Adabas and DB2, and document formats such as AS2, EDI, HIPAA, HL7, SWIFT, FIX, ACORD, and more.

"Completing PeopleSoft's rigorous certification process is an extension of our commitment to PeopleSoft customers," said John Senor, president of iWay Software. "Our continued investment in adapter technology frees IT departments from the tactical costs of developing and maintaining system interfaces and allows IT to focus on projects that are related to their business' bottom line."

The iWay Intelligent Adapter for PeopleSoft Enterprise can be purchased for standalone application access for use with today's leading application and integration platforms, or it can be acquired in a bundle with iWay's XML Transformation Engine (iXTE) to extend installations of PeopleSoft with powerful transformation capabilities, including enterprise systems and applications as well as HIPAA, SWIFT, FIX, ACORD, and other standards.

More information on the iWay Intelligent Adapter for PeopleSoft Enterprise, and all other 250 iWay

adapters is available at http://www.iwaysoftware.com/products/adapters/peoplesoft.html.
