

Retell launch the NEW RP Pro - Call Recording made easy!

Submitted by: Retell

Friday, 12 December 2003

The NEW Retell RP Pro is a high quality business class telephone with call recording directly to the hard drive of a PC. The telephone features 20 lockable memories, on hook dialling and is PABX compatible (also with optional noise cancelling headset). The RP Pro is ideal for any office or call centre environment especially when space is at a premium. The RP Pro also comes with the Retell 957 software and will record time, date and duration of calls. All recordings are compressed therefore only using a small amount of disc space. For more details on Retell products call 01932 730898 (quote sourcewire) or visit us at www.retellrecorders.co.uk
