---

Solihull. – January 13, 2004 – Tecnomatix Technologies Ltd has renewed its partnership agreement with RealityWave Inc allowing it to continue the use of the VizStream® Enterprise Platform for the Tecnomatix eBOP Process Manager – a key element of the company’s eMPower™ family of products for Manufacturing Process Management.

eMPower solutions address “how” a product has to be manufactured and provides the link between product design systems that address “what” has to be manufactured, and shop-floor execution systems that address “when and where”. Part of this solution is the eBOP Process Manager, which provides quick and easy access to electronic Bills of Processes (eBOP) and other manufacturing information stored in the Web-based eMServer.

“Using VizStream, the eBOP Process Manager makes it easy to search, navigate and view eBOPs in real time and at different levels of detail, from a bird’s-eye view to detailed 3D information of manufacturing facilities and products,” said Alex Shapira, Tecnomatix Shop Floor Division vice president and general manager Unit. “Incorporating VizStream’s real-time, dynamic streaming allows users to interact with and exchange 3D manufacturing information over the Web, even over low-bandwidth networks.”

Commenting on the agreement, Aaron Freedman, vice president of Product and Business Development for RealityWave said: “We recognised two years ago that Tecnomatix solutions were leading the pack when it came to an effective, bottom-line impact approach to using Internet technology, and that still rings true today.” We developed the Internet-architected VizStream platform to power interactive 3D throughout the extended enterprise. Tecnomatix eMPower, with VizStream, is a terrific example of a company combining Internet technology and know-how to enhance user value.”

## About Tecnomatix Technologies

Tecnomatix Technologies Ltd. is the driving force in Manufacturing Process Management (MPM). Today’s leading global manufacturers are adopting MPM solutions to expand revenue potential and reduce costs by accelerating product introductions, shortening time to volume, and optimizing production execution. eMPower enables our customers to succeed with its collaborative, open platform and applications for defining, simulating, managing, and executing manufacturing processes across the extended enterprise. ## About RealityWave Inc.

RealityWave develops the leading Internet-architected platform powering Industrial Data Collaboration.

The VizStream Platform enables the access, visualization, and integration of industrial data, including complex 3D models, for Web-based collaboration and communication applications. RealityWave's technology and products empower companies worldwide, including Autodesk, Bentley Systems, Centric Software, Hitachi Zosen, IntraTECH, Lexent, Menasha, SiteScape, SolidWorks, SRAC, TDCI, Tecnomatix Technologies, and Worrell Design, to develop next-generation Web-based Industrial Data Collaboration tools and services. For more information, visit the RealityWave web site at [www.realitywave.com](http://www.realitywave.com), or call (617) 864-5010.
