

# Telecoms Distributor POST CTI relocates to larger offices

Submitted by: Gray Associates

Thursday, 29 January 2004

---

POST CTI, a Value Added Distributor of standards-based communications products, has moved to new offices in Harrogate, Yorkshire.

The move has come about because of the need for POST to expand its technical and sales resources in response to growing market demand for open telephony products. The new 4,500 sq ft office building will enable POST to develop its new Platform Development Division and expand its customer services division. An enlarged storage area will also enable the company to hold a wider range of hardware and software products from leading vendors such as Intel, HP, Envoy, Scansoft and Nuance.

The new headquarters building features a state-of-the-art testing lab and a new Training Centre where customers can take advantage of monthly open telephony training courses. Other state-of-the-art technical facilities available at the site include a Wireless LAN, video conferencing and a speech-enabled automated attendant built using open telephony hardware and software products available through POST CTI.

The building is located at:

Priority House

Grove Park Court

Harrogate

HG1 4DP

To contact POST CTI, please call +44 (0)870 1266633 or mail [sales@postcti.co.uk](mailto:sales@postcti.co.uk)

About POST CTI

Formed in 1997, POST CTI is a Value Added Distributor (VAD) of standard-based communications building blocks from leading manufacturers such as Intel, Envoy, HP, Scansoft and Nuance. POST CTI is the only

VAD of Intel® Telecom Products in the UK and the largest VAD for Intel telecom products in EMEA.

POST CTI provides Value Added Resellers, Systems Integrators and Developers with a single convenient source for communications technologies. In addition to providing a broad and competitively-priced product selection, the company offers custom system integration services and advice, finance options, sales training and marketing/technical educational seminars.
