

Retell call recording - flying high in 2004.

Submitted by: Retell

Friday, 6 February 2004

Retell are proud to report record sales for January. The Retell call recording software 957 advance helped them get off to a flying start at the beginning of 2004. Also sales of their ISDN2 and analogue systems along with their newly launched CD-RW based range attracted many dealers who are looking for low cost solutions for their SME customers. Steve Cobley – Head of Business Development said “January has been our best month yet, and with the launch of our new Quarto and Octo 4 & 8 channel analogue recorders in March, 2004 looks set to be a fantastic year for Retell. Marketing Manager, Jo-Anne Howard said “I have seen Retell expand dramatically in the last 3 years, and with the new additions to both the sales and customer support teams along with the refurbishment of our premises Retells future looks brighter than ever.
