Riello UPS Set To Capture UK Investment Surge With New Master Dialog and Green 'Eco' Option

Master Dialog Set To Play A Part In New Public Sector and Large Data Centre Projects

The Master Dialog range has been extended with new modules from 250 to 800kVA. These can be used individually, in N+1 redundant or parallel configurations up to a massive 6M8VA for large infrastructure and data centre projects.

All the new models use the tried and tested Master Dialog technology with its advanced features and options. These include the innovative double-conversion on-line capability with a transformer isolated inverter output. This means that the load is powered continuously by the inverter, using a EMI filtered, stabilised and regulated sinewave supply. An enhanced option is the new 'Eco' technology that allows the UPS to run in standby mode to achieve operating efficiencies up to 98%.

"In public sector and large data centre projects any down time can cost millions and lead to massive disruptions", commented Robin Koffler General Manager for Riello Galatrek. "The new ECO mode option at these power ratings can save thousands in wasted electrical energy".

All Master Dialog UPS include a host of communication features, serial and volt-free signal contact ports and the option to be remotely monitored on a 24-7 basis using the Riello UPS TeleGuard service centre package.

Master Dialog comes with Riello Galatrek's highly acclaimed multi-platform PowerShield² UPS monitoring and control software and offers an outstanding long runtime solution for critical applications, with the opportunity to extend back-up power to several hours duration using matching battery extension packs. As an alternative, users can choose to specify one of Riello's range of highly advanced auxiliary generator solutions.

The new models are featured in the NEW Industrial-Electrical Riello UPS catalogue out now. Phone Riello Galatrek on 0800 269 394 email sales@riello-ups.co.uk or visit www.riello-ups.co.uk.

Riello Galatrek Ltd. is the UK subsidiary of Riello UPS Manufacturing srl, manufacturers of over 100,000 UPS units a year and a dominant force in the European UPS market, with a presence in all key sectors. Riello UPS purchased the uninterruptible power systems sales and services business of Advance Galatrek in March 2003 to form Riello Galatrek Ltd. and combine the strengths of the two organisations. Last year Riello UPS launched more new products than any other UPS manufacturer and has recently been awarded the European Growth Strategy Leadership Award from Frost and Sullivan.

Riello Galatrek operates a UK based technical team for support, custom UPS design and UPS accessory development. Primary UPS development is carried out by Riello UPS at three research centres in Italy. Development focuses on advancing UPS technology with improved performance, enhanced features and the ultimate in reliability. The Riello product range covers 400VA to 6MVA with a host of remote monitoring software options include the TeleGuard 24/7 service package.

A further service provided by Riello UPS is their Technical Energy Consultants (TEC) division. This is staffed by experienced engineers who provide advise on UPS design, selection and customisation for large installations to consultants, specifiers, installers and corporate users. The TEC division also runs a number of Energy Forums across Europe with leading partners to help prompt discussion on power protection and business continuity issues. Riello Galatrek, the UK subsidiary of Riello UPS runs such Energy Forums in association with The Institution of Electrical Engineers (IEE).

Riello Galatrek's UK headquarters is located in new premises at Wrexham, just off the M53 and within 40 minutes of Manchester airport. Here customers benefit from training for their own service engineers and other support such as; site surveys, installation, commissioning, on-site training and 24/7 remote monitoring. The company operates through the UK and Eire with a team of service engineers in strategic locations and a national sales team.
