Vice Presidents of Product Management and Research and Development Ensure Ongoing Product Innovation—Enhance Company's Leadership Position in Application Security Industry

New York City—April 7, 2004—KaVaDo Inc., the technology leader in the Web Application Protection industry, today announced the appointments of Jeannine Bartlett to the position of Vice President, Product Management and Yigal Rozenberg to the position of Vice President, Research and Development. In these roles Bartlett and Rozenberg will be responsible for the ongoing innovation of KaVaDo's award winning technology and the continued growth of the InterDo and ScanDo Web application security solutions.

Over the past 20 years, Bartlett has held a variety of marketing, R&D and business development executive positions. As the Vice President of Product Management of KaVaDo she will be charged with overseeing the growth of the company's Web application security product line. Prior to joining KaVaDo, Bartlett was a founder and the CEO of InteriorTrade, a vertical market Internet service provider with customers across 22 countries. Before InteriorTrade, she was Senior Vice President of Research and Development with Segue Software, where she led engineering teams across the US and Europe in the delivery of enterprise testing and performance monitoring products for secure e-commerce systems. Bartlett also served as the Vice President of Product Management for Segue.

"KaVaDo has established a strong track record with two proven Web application security products that deliver unmatched customer value -- a fact that has allowed the company to carve out a strong leadership position in a critical and growing market," said Bartlett. "I look forward to bringing my experience and skills to the executive team and helping make the KaVaDo product suite the de facto standard in the application security industry."

Rozenberg has been with KaVaDo since the company's founding in 2000, serving as an integral component of the advanced technology team and the key architect of InterDo, KaVaDo's Web application firewall. Rozenberg also managed the InterDo development team, bringing to market innovative solutions that earned InfoWorld's 2004 Technology of the Year Award. In his new position of Vice President of Research and Development, Rosenberg will be charged with overseeing continued innovation in all company solutions.

"The KaVaDo product team has developed a strong suite of security solutions that protect Web applications from attacks," said Rozenberg. "As the Vice President of Research and Development, I look forward to further developing the technology to maintain our leadership position and ultimately meet the ongoing security needs of our customers."

About KaVaDo, Inc.

KaVaDo provides next-generation Web Application Protection and assessment solutions for the corporate market using its patent-pending Protected Path™ technology. These solutions account for the various types of threats against Web applications and allow users to apply the necessary protection against potential threats, known and unknown.
