Address Critical E-mail Archival and Compliance Requirements Utilizing Vast Range of Media

Reading UK, Springfield MA — May 25, 2004 — C2C Systems today announced that Computer Associates International, Inc. (CA) has certified Archive One as interoperable with CA's BrightStor ARCserve Backup.

The integrated solution will allow organizations to store their archives on any of the vast range of storage media supported by BrightStor ARCserve Backup including DAS (Direct Attached Storage), NAS (Network Attached Storage), SAN (Storage Area Network), CDO, DVD or Worm. Archive One has received the ca smart seal of excellence, which is awarded to solutions that integrate seamlessly with CA products, enabling customers to take advantage of best-in-class enterprise technologies while minimizing cost, time-to-benefit and risk.

"Efficient, policy-driven archival of e-mail is critical to addressing today's regulatory requirements and a sound information management strategy," said Jim Geronaitis, vice president of product marketing for BrightStor storage management at CA. "Archive One's integration with BrightStor ARCserve Backup enables organizations to achieve these goals, combining a specialized archiving solution with industry-leading storage management."

BrightStor ARCserve Backup – CA's award-winning data protection solution – enables organizations to ensure the integrity and availability of critical business data on Microsoft Windows, NetWare, Linux, UNIX and MAC OS X servers and clients.

Archive One — C2C's e-mail archiving solution for Microsoft Exchange — helps users reduce mailbox size, meet internal e-policy requirements for e-mail retention and deletion, and meet e-mail compliance regulations such as SEC Rule 17a-4 or HIPAA (Healthcare Insurance Portability and Accountability Act).

"Archive One has already achieved recognition for its ease of installation and ease of management," says Dave Hunt, CEO of C2C. "Coupling this with CA's BrightStor ARCserve Backup will give customers flexibility and a huge range of storage options."

## ABOUT C2C
