## Automata Appointed Exclusive UK Distributor for IMCD™ Software

Automata ([www.automataservices.com](http://www.automataservices.com)) has become the UK's exclusive distributor for US ContingenZ Corporation ([www.contingenz.com](http://www.contingenz.com)) to distribute Incident Management CD (IMCD™). This is a groundbreaking, automated software tool for quickly building a business continuity Incident Management Plan for small to mid sized organisations that do not have specialist continuity staff. IMCD™ uses a verbal commentary to educate the user, ask the questions. It then automatically undertakes a "Gap Analysis" and produces a plan enabling a business to protect itself and respond to any type of threatening incident such as cyber attack, data loss, terrorist incident, power outage, flood or fire. IMCD™ is also ideal for public sector organisations such as schools, colleges, universities, hospitals and health care practices. For full details of the software go to:  
<http://www.automataservices.com/contingenz.htm>

Garry Poole, the CEO of Automata, said "IMCD™ perfectly compliments Automata's "one stop shop" of global business continuity services (training, consultancy, enterprise software etc) for major enterprises by providing an automated solution to business continuity planning for small to medium sized organisations. Such organisations understand the need for anti-virus software but in the past have struggled to protect themselves against other dangers to their survival. IMCD™ assists by dealing with any type of incident using techniques perfected by major global enterprises. Automata believes the package is the perfect solution for insurance companies wishing to assist business interruption insurance customers and Garry would welcome enquiries in this regard. Garry further stated "We intend to distribute IMCD™ to 1000's of small to medium sized enterprises enabling them to produce business continuity plans easily and cost-effectively. Furthermore, it is the perfect solution for public sector organisations with limited budgets such as schools, colleges, police stations and hospitals. As with all Automata products and services, the product will be supported by Automata's FREE BCM internet help desk with assistance provided by our world class experts."

### About ContingenZ Corporation

ContingenZ Corporation is the maker of IMCD™, the automated tool for building a fully customized Incident Management Plan for small to mid-sized businesses. IMCD™ incorporates the ContingenZ methodology that transforms the old-style tedious planning process into a modern technique that boasts a high return on investment (ROI) with greatly improved levels of protection. More information about ContingenZ and IMCD™ is available at: [www.contingenz.com](http://www.contingenz.com)

### About Automata
