PRESS RELEASE – PRESS RELEASE – PRESS RELEASE

For Immediate Release

Do It In-A-Flash

Avanquest announces the launch of 'In-a-Flash' to add to its wide portfolio of software products published in the UK.

If you have ever wanted to liven up websites introductions, marketing banners or advertisements but never had the time or software, well with the arrival of 'In a Flash' almost any piece of work can be transformed into flash animations within minutes.

In A Flash Suite brings you 3 terrific tools to make the most out of your ordinary documents.

- In A Flash Pro 3.2 makes it easy for anyone to build their own animations using customisable animation effects such as rotations, sweeps, explosions and much more. Plus you could even add your own narrations or other audio tracks.
- FlashLab 1.1 allows both beginners and sophisticated Flash users to quickly and easily browse and convert Flash files. Using the preview window allows you to see the size, version, width, height, frames per second and number of frames quickly and easily. Furthermore you can convert your Flash animations into eye catching screen savers and Desktop Backgrounds.
- PowerFlash provides you with a Microsoft PowerPoint add in tool creating a toolbar and menu item giving you an "Insert Flash" opportunity within minutes.

In A Flash retails at £39.95 inc. VAT. Further information can be found at www.netgui.co.uk.
