IT'S NOT JUST SLEIGH BELLS THAT ARE RINGING...

Don't let jingle bells be the only sound you hear this Christmas – why not introduce the ringing tone of a Brother fax machine into your home instead!

For friends and relatives purchasing Christmas presents for that person who works from home, a Brother FAX-T98 has to be the answer.

With its smooth contours and ice blue trim, the FAX-T98 has been designed to blend easily into the modern home while retaining all the performance you would expect from a Brother machine.

It offers a 14,400bps modem enabling a fax to be transmitted in as little as 9 seconds, a digital answering machine allowing up to 15 minutes of recording time and a remote message retrieval facility.

An integrated telephone handset, a useful hands-free speakerphone and a phonebook with 100 speed dial names and numbers is also incorporated, and it doubles up as a plain paper copier with the option to reduce and enlarge documents from 50 per cent to 150 per cent.

Other features include: up to a 25 page memory to ensure that vital fax messages are never missed; a ten-page automatic document feeder meaning that you don't need to waste time standing over the machine and an easy to read two-line backlit display.

The FAX-T98 retails at a very competitive £129.00 SRP (ex VAT).

Contact Brother on 0845 60 60 626 (stockist information and brochure requests), 0161 931 2354 (helpdesk), sales@brother-uk.com or visit the Brother website at www.brother.com.
