

# Version One's Continued Success in Deloitte Technology Awards

Submitted by: V1 Ltd

Monday, 27 September 2004

---

For the third consecutive year, Document Management and Imaging Software company, Version One, has been ranked by Deloitte as one of the 50 fastest growing technology companies in the North in the prestigious 2004 Deloitte Technology Fast 50 Awards.

Deloitte created the Technology Fast 50 to support UK technology companies and champion innovation in the sector, recognising those companies that have shown impressive growth rates over the last three financial years.

Version One's Director, Tony Bray, commented, "Our continued success in these prestigious business awards shows that companies with real solutions that satisfy real customer needs will continue to experience dramatic growth. It is also a tribute to the continued dedication and hard work of our staff and business partners.

"Demand for our Document Management and Imaging software continues to grow and our strategic alliances with the main accounting and ERP software vendors means that increasingly more organisations worldwide are realising the tremendous business benefits which our paperless office technology can bring them."

Damian Sanders, technology partner for Deloitte's Northern Fast 50, said: "The standard of entrants was once again very high, further confirming the resilience being shown by the regional technology sector."
