---

[London, UK, October 21, 2004] CodeFutures, the Java code generation tool vendor, today announced results in the third quarter, confirming the recent increasing momentum in sales. CodeFutures new customers include Siemens, JP Morgan, Turner Broadcasting, Business Wire, EMC, and the Missouri Lottery. CodeFutures sales doubled in Q3 compared with the previous quarter, mainly due to the launch of its flagship FireStorm/DAO Architect Edition, repeat business from existing customers, and a marked improvement in Information Technology investment.

The award-winning FireStorm/DAO makes Java software developers more productive by generating the business logic for accessing databases. The benefits provided by CodeFutures' code generation approach are higher developer productivity, better software quality, and lower maintenance costs.

High profile customers added to CodeFutures' impressive customer list included Turner Broadcasting, EMC, AREVA, JP Morgan BankOne, Business Wire, and Siemens Business Services. Additional large systems integrators using FireStorm/DAO in customer projects included Agnitio Group, Ajilon, Ergo Integration, IDC Global, and Resource Consultants, Inc.

"We're particularly happy to add independent software vendors such as Brocade Communication Systems and Peace Software to our customer list because they tend to provide great product feedback" explains Andy Grove, CodeFutures' Chief Technology Officer.

CodeFutures also added two new government sector customers: Missouri Lottery and the Canadian Institute of Health Information.

"We anticipate continued growth in sales through the end of the year, keeping pace with the renewed growth in the Java development market and increased interest in Java code generators" says Dan Froelich, VP Sales, CodeFutures.

Additional information, customer testimonials, and case studies are available at:

FireStorm/DAO Architect Edition is priced at \$3,495 per developer. There are no runtime deployment licensing fees.

About CodeFutures

CodeFutures is the leading supplier of Java software development products for advanced data persistence.

The benefits provided by CodeFutures' approach are higher developer productivity, better software quality, and lower maintenance costs. CodeFutures' first product, the award-winning FireStorm/DAO, makes Java software developers more productive by generating the business logic for accessing relational databases in service-oriented and object-oriented architectures.

CodeFutures' products are used by corporate Java software programmers in sectors such as television (BBC Technology, Turner Broadcasting), finance (Lehman Brothers, JP Morgan), military systems (BAE, Lockheed Martin), government (Missouri Lottery, Port of Barcelona), IT consulting (Siemens Business Systems, LogicaCMG, BearingPoint), retail (MetCash, Ahold USA), high technology (EMC, Macromedia), and industry (Suzuki, AREVA).
