

Retell helps spread the cost of call recording

Submitted by: Retell

Tuesday, 7 December 2004

Retell Limited have joined hands with finance company Lease Direct to offer their customers both lease rental and lease purchase options when buying from their extensive range of call recording products. When customers utilise this option they can benefit from tax relief on repayments, fixed rate finance agreements and improve their cash flow by paying regular payments over a time frame that suits them. Steve Cobley, Head of Business Development says ' It's not easy for today's Telecomms or IT buyer – choosing the right supplier is as important as choosing the right system, a supplier who can also offer their customers a "financial solution" which provides payment flexibility will have the competitive edge.' Lease finance can ease the strain, provide 100% financing without a down payment and the customer will have more money available to invest in other profit generating activities.
