Avanquest UK (formerly known as Avanquest Kommunicate) announces release of Captaris RightFax 9.0

Avanquest UK, provider of Business Process Management solutions, the largest UK distributor for Captaris RightFax, announces the release of RightFax version 9.0. This latest release delivers significant enhancements for administrators and users, setting a new standard for automated fax delivery and enhanced business process management.

RightFax 9.0 is the market-leading enterprise fax and e-document delivery solution offering the performance, security and scalability needed by today's enterprise, whatever the size. By delivering reliable software that simplifies processes for users, RightFax helps organisations rapidly improve efficiency and reduce costs through integrating and automating the flow of a full range of fax, paper and electronic documents and data. In addition, RightFax offers a clear migration path for enhanced e-document and business information delivery through seamless integrations with Teemplate business process workflow and Interchange content integration solutions.

Chris Thompson, CEO of Avanquest UK says "electronic fax servers play a crucial role in today's information delivery infrastructure. Avanquest can report continued growth in RightFax installations, from both new and existing customers. Extensive feedback from both our Resellers and customers means we are able to deliver the most robust enterprise fax and e-document delivery solution yet created. RightFax 9.0 offers quicker and easier deployment, simplified interfaces for more rapid adoption, and performance enhancements, all of which lead to increased returns on IT investments for our customers."

Organisations, including healthcare, financial and mortgage services, manufacturing and government rely heavily on paper-based systems. Solutions built on RightFax enable the conversion of paper-based data into electronic form, automating and streamlining costly and inefficient manual processes.

Captaris RightFax is the proven market leader in enterprise fax and e-document delivery solutions. According to the Davidson Consulting Computer-Based Fax Report (2003-2008), the fax server market grew at a respectable 8.3% annual growth rate over the last few years. RightFax has a 24.6% share of the world wide market, beating other fax server providers by a factor of two and half.

RightFax has an extensive UK customer base, which include Barclays Bank Plc, British Airways, BP, 10 Downing Street, Transco, Yell and many more. It also has certified integrations with leading software vendors such as Microsoft, Oracle, SAP, Xerox, HP and IBM Lotus.

RightFax developer, Captaris, continues to heavily invest in RightFax. The latest technology including Fax over IP, an open SQL database, integrated support for SMS as a document delivery type and the new RightFax Web Access module means that any RightFax investment delivers features and technology that serve enterprise customer needs today and can be used as the foundation to enhance their document delivery strategies in the future.

RightFax 9.0 Key Features and Benefits

Open Database -leverages Microsoft SQL server to support the scalability, reliability, performance and interoperability needs of enterprise customers.

RightFax Web Access (new Microsoft .NET-based Web client) -provides updated intuitive .NET-based Web interface for sending, receiving and managing faxes to make it more robust and flexible for users as well as easier to deploy for administrators.

Expanded security and privacy capabilities -provides two-tiered administrative layers and restricts viewing of fax content by administrators, tracks users who view a fax and disallows boards-level binary file transfers, unless opted.

Short Messaging Services (SMS) enhancements -users can now create and send SMS messages from various RightFax clients such as Outlook, Notes, FaxUtil, etc. Also introduces functionality to send SMS messages in an automated production fax environment and provides bi-directional SMS text messaging to support global customers and improve usability.

IBM Lotus Notes enhancements -upgraded support for Lotus Notes R6.5 including iNotes, support for Lotus Notes clustering, enhanced reporting, SecureDocs from Notes (certified delivery and encrypted PDF), support for SMS, as well as a host of other enhancements to simplify deployment and improve usability, security and reliability.

Fax over IP (FoIP)- supports Internet real-time faxing standard T.38 via Brooktrout's TR 1034 intelligent fax boards to provide a secure on-ramp for organizations wishing to take advantage of FoIP.

Do Not Fax/Do Not Dial -supports anti-Spam measures and compliance with FCC regulations TCPA and Junk Fax Protection Act by checking outgoing faxes against a list of numbers to be blocked.

About Avanquest:

Avanquest UK is part of the Avanquest global organisation. Formed in June 2003 by parent company BVRP Software Group, Avanquest is a network of companies offering a complete range of software publishing resources and a worldwide market to software developers from around the globe. Avanquest has a local presence on five continents and long-established relationships across all channels of distribution in markets covering nearly 90% of the world's total software sales. BVRP Software Group, a leading international software developer and publisher, was founded in Paris in 1984 and is listed on the Nouveau Marché of the Euronext stock exchange (ISIN FR0004026714).
