Specialist distributor takes on the only ISO 15408 anti-spam, anti-virus solution available today

London, UK (14th December 2004) - BorderWare Technologies announced today that it has signed an agreement with e92plus Limited to distribute BorderWare's MXtreme Mail Firewall within the UK.

Founded in 1989, e92plus is a specialist distributor in network and internet security. The company has a strong track record of creating long term relationships with resellers to supply them with best of breed products and a superior level of service including technical support, consultancy and training, both in the UK and mainland Europe.

"Email Security is one of the primary concerns of many companies so we have to ensure we have the right products in our portfolio to enable our resellers to be confident that they can respond to their customers' exact requirements. The very high level of email security afforded by MXtreme combined with its competitive pricing makes it a perfect addition to our portfolio," comments Mukesh Gupta, Managing Director of e92plus.

The deal to distribute MXtreme will allow e92plus resellers to offer their customers the only mail firewall to gain a Common Criteria EAL4+ security certification (ISO 15408). MXtreme installs at the network edge to deliver the most comprehensive perimeter security for email systems and protects email systems from all threats including Denial-of-Service attacks like MyDoom, buffer overflows, directory harvesting, spam, viruses, and other vulnerabilities that could paralyse email communications.

"BorderWare Technologies is delighted that e92plus has chosen to become a distribution partner in the UK. We are sure that, given the strength of our product, the presence that e92plus has in the channel and the increasing importance of email security, this relationship will prove highly beneficial for not only BorderWare and e92plus, but also for their extensive base of resellers," said Peter Cox Vice - President of BorderWare Technologies.

###

About MXtreme
MXtreme Mail Firewall, The Benchmark for Email Security, is the ideal platform to replace existing mail gateways with a certified secure solution. It installs at the network edge to deliver the most comprehensive perimeter security for an organisation's email infrastructure. MXtreme is the only mail firewall to gain a Common Criteria EAL4+ security certification, assuring users that their email systems are protected against spam, viruses, Denial-of-Service attacks like MyDoom, buffer overflows, directory harvesting, and other vulnerabilities that could paralyse email communications. MXtreme also provides the industry's first failsafe clustering architecture for high-availability to ensure zero downtime, zero latency and zero message loss.

About BorderWare
Founded in 1994, BorderWare Technologies Inc. is the benchmark provider of messaging security solutions

for enterprises and government. The company's flagship MXtreme Mail Firewall is the market-leading appliance for securing an organisation's email infrastructure. Similarly, BorderWare's SIPassure SIP Firewall delivers the benefits of Internet telephony by managing and protecting the flow of VoIP-specific SIP communications for enterprises and carriers. BorderWare has more than 6000 customers with systems deployed at various military, intelligence, defence, national security agencies, and corporations worldwide. The company has developed affiliations and partnerships with some of the industry's most prominent companies in Internet infrastructure, security and messaging including Cisco Systems, F5 Networks, Sun Microsystems, RSA Security, Research In Motion (RIM), Symantec and Kaspersky Labs. BorderWare is a private company headquartered in Toronto, Canada with offices in London, Frankfurt, Stockholm, Dubai, Ottawa, Dallas, San Jose, New York, and Washington DC.
