Unisys Formalizes Sales and Support for Full Range of Datawatch Compliance, Auditing, Accounting, Billing and Business Processes Solutions

London – January 10, 2005 – Datawatch Corporation (NASDAQ: DWCH), a leading provider of report management, data transformation and service management solutions, today announced an alliance with Unisys Corporation (NYSE: UIS). The two companies will work together to allow organizations to more easily meet various regulatory requirements by more efficiently managing and analysing data.

Under the agreement, Unisys will offer sales and enterprise support for Datawatch's full portfolio of business information solutions including Monarch|RMS, Web-based report mining and analytic software; Datawatch|Researcher, for collaborative, documented research of enterprise content and metadata; and Monarch Data Pump, a .NET-based automated data extraction (ETL) and data/report delivery tool.

"The global reach and experience of Unisys will bring the power of Datawatch information management and analysis solutions to a whole new audience," said John Kitchen, senior vice president, Desktop and Server Solutions, Datawatch. "Unisys customers will now be able to fully leverage their existing IT investments to solve real world business problems and improve business processes with unprecedented ease and speed, with a compelling ROI."

"Unisys and Datawatch provide very complementary products and services, making this an ideal arrangement," said Richard Loibl, Partner Relationship Manager, Unisys. "Unisys is delighted to be able to provide our customers with access to Datawatch solutions that will significantly enhance the value of their current systems by improving the flow, quality and management of existing information throughout the enterprise."

ABOUT DATAWATCH

Datawatch Corporation helps organizations easily access, store, distribute, transform and analyse information throughout the enterprise. From report management and analytics to data transformation and Internet presentment, Datawatch Corporation provides solutions that allow organizations to fully integrate and leverage their existing sources of information. Datawatch products are used in more than 20,000 companies, institutions and government agencies worldwide.
