

Better Oral Hygiene - from a Tablet!

Submitted by: 2CC Marcom Ltd

Wednesday, 19 January 2005

Yes it's true! An innovation in oral hygiene, in a tablet.

The Swedish have brought us the Volvo, Ikea and now, ProDen PlaqueOff™.

Discovered and developed by a Dentist, PlaqueOff has shown to have some remarkable effects. Preliminary data from clinical trials conducted in Sweden showed reductions in tartar levels by up to 68% and reductions of plaque levels by up to 87% (Data on file). All this, from humble seaweed.

The product is 100% natural and is made from especially selected seaweed from the Ascophyllum Nodosum family. It contains no artificial colours, preservatives, gluten or sugar.

The dental profession is already impressed:

"...All the patients that trialled this product had a marked reduction in the amount and density of calculus – it was so much easier to remove..." (York Dental Practice), "...Hugely Encouraging..." Bognor Regis Dental Practice

With improvements seen within 5 – 8 weeks, this revolutionary product is 2005's must have oral hygiene product!

Available from selected outlets including Holland and Barratt and by mail order on 0845 226 0660. RSP £15.99
