

Easier Access to Treatment Abroad for UK Patients

Submitted by: Ainsworth Maguire

Thursday, 17 February 2005

A new web site, www.treatmentabroad.net, promises to give more treatment choices to those seeking alternatives to UK based providers. Within 48 hours of completing a simple enquiry form, visitors receive quotes for treatment from three different countries or providers – available often at a much lower cost than in the UK. The site has been designed, launched and is managed by Intuition Communication.

Keith Pollard, director of Intuition, explained, “We have received many enquiries about treatment overseas from our UK private healthcare site, privatehealth.co.uk. There has also been growing interest from overseas healthcare operators wanting to attract UK customers. We decided that now is the right time to put them together in a dedicated portal.”

Treatmentabroad.net provides access to overseas treatment in Belgium, Germany, Switzerland, Spain, Greece and South Africa for a range of needs including cosmetic surgery, dentistry and infertility problems. Significant savings can be expected, for example, dental implants can cost half that of the same treatment in the UK.

“Whether male or female, young or elderly, the web site is designed to provide patients with the information they need to make an informed choice for their treatment. This is a one-stop-shop that gives easy access to the high standard of medical skills available in select clinics with an easy to understand comparison of costs involved,” added Keith.

While Keith acknowledges surgery in another country may not be for everyone, treatmentabroad.net does give everyone greater access to choice. Some people even choose to combine a holiday – depending on the kind of treatment received.

Any surgery is an important decision for an individual; www.treatmentabroad.net provides an easy resource to help with that process.
