Wily Technology will be supporting BEA Systems' 'Citizen Service Delivery Platform' which will be discussed at the Government UK IT Summit, 23 & 24 May 2005, London

London — May 20, 2005 — Wily Technology, the leader in enterprise application management, announced that it is going to be working with BEA Systems (Nasdaq: BEAS), a world leader in enterprise application infrastructure software, to help UK government organizations and bodies improve the quality of the service delivery they can provide to UK citizens, via software applications built on the BEA Systems 'Citizen Service Delivery Platform'. This initiative is built on an existing partnership between BEA and Wily Technology and will be discussed with Public Sector organizations at the forthcoming 'Government UK IT Summit,' organized by the European Technology Forum, in London on May 23 & 24, 2005. Wily Technology and BEA will share a stand at the event.

Matt Price, Head of Marketing & Alliances Europe at Wily Technology, said: "With increasing demands being made upon local authorities, central government bodies and other public sector bodies in the UK, the importance of utilizing IT to effectively support eGovernment initiatives has never been stronger. Wily Technology understands the needs of public bodies to harness existing software applications and infrastructure to maximize performance, reliability and security to deliver services and information to the public. Working with BEA on its Citizen Service Delivery Platform initiative, we can help these organizations ensure that they are meeting the targets and objectives they are being given to provide eGovernment in UK."

Also at the Government UK IT Summit, Wily Technology will be hosting a debate called 'Crossing the Chasm' which will be hosted by Matt Price, looking at how the Public and Private sectors can share best practices to help ensure service delivery to customers. On the panel of the session will be Richard Barrington, Head of Government Sector at Sun Microsystems, Richard Granger, Director General of NHS IT and Johanna Law-Riding, Operations Director at Liberata.

About BEA Systems' Citizen Service Delivery Platform

The foundation for integrating information, applications and processes within and across local authorities, central government and other agencies; allowing the public sector to improve access, reduce costs, eliminate redundancies and accelerate time-to-value.

About BEA

BEA Systems, Inc. is a world leader in enterprise infrastructure software, helping enable companies to improve business responsiveness through service-oriented architecture (SOA), a software design approach that more closely aligns IT with business objectives. With 15,000 customers worldwide including the majority of the Fortune Global 500, BEA and its WebLogic® and Tuxedo® brands are among the most trusted names in business technology. Headquartered in San Jose, Calif., BEA has 76 offices in 36 countries. More information on BEA products and services is available at www.bea.com.

About Wily Technology, Inc.

Wily Technology is the market-leading provider of Enterprise Application Management solutions. Wily's products enable companies to successfully manage their critical Web applications and infrastructure by providing real-time, end-to-end visibility into the performance and availability of these systems.

Wily's collaborative management approach allows enterprises to rapidly detect and diagnose application slowdowns and failures, and better assess the impact of application performance on business success. This means better customer service, more stable revenue streams, and higher IT productivity. Based on the strength of its innovation, partnerships, and solid customer base, Gartner, Inc. has placed Wily in the leader quadrant in the J2EE Application Server Management Magic Quadrant.
