

StreamShield Networks Recruits Networking Veteran to Lead Product Marketing

Submitted by: Portfolio Communications

Thursday, 16 June 2005

London, 16 June 2005 - StreamShield Networks, the leader in real-time internet content security, today announces the appointment of Geoff Bennett as Director of Product Marketing. Geoff brings to StreamShield over 20 years of product marketing experience gained in global networking and telecommunications companies including FORE Systems, Marconi, and Bay Networks. Geoff has a proven track record in marketing technically advanced leading edge networking products.

"I am excited to be joining StreamShield Networks at this important stage in its evolution", comments Geoff Bennett, Director of Product Marketing. "StreamShield has a significant lead in the internet content security market with its revolutionary new Content Security Gateway and I look forward to maximising the opportunity for the company."

Simon Gawne, CEO and Founder of StreamShield Networks, comments: "With the StreamShield product solution coming to market we have a major opportunity to leverage our competitive lead. I am delighted that Geoff has joined us to develop our product marketing activities. His experience and talents are a major asset to the company."

Geoff joins StreamShield from Corvil, an IP quality of service (QoS) start-up company. Prior to this Geoff held numerous marketing and technical roles at Marconi, FORE Systems, Bay Networks, Wellfleet and Proteon. He also has an extensive portfolio of written and published work to his credit, having worked at Light Reading, and is a renowned public speaker.

About StreamShield Networks:

StreamShield Networks is the first company in the world to provide integrated, internet-based protection for email, web and other real-time internet applications. Its products and services can identify and block threats – such as viruses, worms, other forms of malware, phishing scams, spam, and inappropriate content – in the internet before the content reaches any users and harms their computer systems. For further information please visit www.streamshield.com.
