PRESS RELEASE 19:01:2006

## SUNSHINE OPPORTUNITIES FOR FRANCHISEES ON THE COSTA BLANCA

Overseas property investments ( OPI )the leading property management and letting agent on the Costa Blanca is pleased to announce its official launch of its franchising opportunities.

Lee Jones, Sales and Marketing Director described the launch as "a fantastic opportunity for our brand to grow" and went further by insisting "each franchisee will be chosen on its ability to deliver our core principles in this extremely active market".

Having established itself as the leader of their services in their immediate geographical area, the three Directors made the important decision to develop the business through franchising.

"Many people came to Spain to buy or set up a business and this is where they fail, by simply not having local knowledge and experience", Jones continued. "Offering these people our opportunity will take away the pain, stress and heartache that engaging in a new enterprise can bring, especially abroad".

Overseas Property Investments have invested recently in market leading software that will deliver superior management information and offer clients excellent promotional facilities for the rental properties . Recently agreeing a significant partnership with MASA International to handle all of their letting and property management business has further enhanced its position.

Having reviewed the costal opportunities OPI will initially offer 12 territories with a vision to increase along the coast both to the south and north. Jones concluded,"an exciting time for our business but even more for the winning franchisee".

Overseas Property Investments is a property management and letting company handling over 300 properties and 1,000 letting transactions. Its business has been in successfully operating since 2001.
